

Products and services for fish farms

Fish farming has grown rapidly in recent years and HD employees have been working to increase the company's supply of services and products for aquaculture. The foundation of this development is on the one hand our years of cooperation with the aquaculture sector, is ok in farming and on the other hand the experience of HD employees in servicing the country's fisheries companies and hot water utilities with a wide range of solutions.

We create safety for our customers through efficient and cost-effective operation of the equipment, automatic monitoring, & preventive maintenance
