

# Calpeda

## Vertical multi-stage pumps

### USE

- Transport of hot and cold water
- Transport at seawater for aquaculture

### ADVANTAGES

- Possibility of mounted speed converter from manufacturer
- Easy to replace shaft seal without removing the motor
- Flanges in multiple implementations available
  - Fit into the footsteps of Grundfoss multistage pumps

### PROPERTIES

- Performance:
  - 0,3-33 L/s
  - 1-120 m<sup>3</sup>/h
- Pumping lift
  - 10-240 m
- Water temperature:
  - 15°C -> 120°C
- Motor sizes:
  - Up to -> 45kW / 60HP
- 1-phase motors available for small pumps

HD has for many years sold and serviced Calpeda borehole pumps in Iceland.

Calpeda was founded in 1959 in Italy and today produces over 2.000 models of pumps used in

- Heavy industry
- Agricultural
- Water utilities
- Wastewater
- Homes

HD can offer a very wide range of quality multistep pumps suitable for

- Cold water
- Warm water
- Seawater for aquaculture

HD works with customers throughout the timespan of a project

- Choice and design of pumping equipment
- Purchases and imports
- Changes in main pipelines and pumping stations
- Installment and startup of equipment
- Service and fault analysis
